

Twenty20 Vision Aids
YOUR LOCAL LOW VISION STORE

LBB's Top Ten Adaptive Products

LBB's Twenty20 Vision Aids store has all of these items for purchase. These products are designed to help individuals with vision loss and will enhance independence, safety, and confidence. If you need a specific item you can't find in our store, we are happy to order for you!

Large Face or Talking Watch

A large face watch has good contrast and large numbers for easy readability. A talking watch will give you the time with a touch of a button and you can also set an announcement and alarm.

Talking Clock

Time is announced with the touch of a button and the clocks are easy to set. Some talking clocks offer announcements, large displays, date announcement, volume controls and different alarm sounds.

20/20 Pen

This is a bold, felt tip pen that makes handwriting stand out. The pen does not bleed through paper and will not leak.

Large Print Calendar, Date Book, and Address Book

Large print wall calendar or spiral bound datebook provide ample space to write down appointments and special dates. The days and months are in bold print for easy readability. Large print address books are an easy way to keep track of contacts, with plenty of space to write phone numbers and addresses.

Writing Guides

Writing guides are available in a variety of sizes and are designed to assist you with specific tasks including writing a check, addressing an envelope, or writing a letter. Guides are made from durable plastic, are lightweight, and are easy to carry.

Magnifiers

Magnifiers help with reading small print and fine detail. Available with or without light, magnifiers come in a variety of sizes and strengths and are great for reading price tags, food labels, and/or medication bottles.

Digital Audio Recorder

Recorders are great for important information such as doctor's instructions, medication dosages, important phone numbers, and dates. Basic recorders range from easy to use to more technical.

Bump and Locator Dots

Bump and locator dots are available in a variety of sizes and shapes and provide a way to differentiate between surfaces. These tactile reference points are great for labeling microwaves, stoves, washers, dryers, and computer keyboards.

Sunglasses or Sunshields

Sunglasses with UVA and UVB protection are essential for protecting eyes from ultraviolet rays which damages eyes. Sun shields come in a variety of tints to help with glare control. Sunshields have a comfortable fit and can be worn inside or outside or over an existing pair of glasses.

Liquid Indicator

The liquid indicator lets you know when your cup or glass is full. A slow beep sounds as liquid nears the top, and a faster, higher pitched beep sounds once the liquid reaches the top of the glass/cup. This helps eliminate overflowing.
